# Building Confidence and Clarity Around AI in Higher Education

Since September 2024, we have been working to support lecturers and students in navigating the rapid rise of AI in education. Just over a year into the project, we are proud to share that AI-HED has delivered concrete results, meaningful insights, and a growing community of engaged educators across Europe.

## Exploring AI in the Classroom: Takeaways from the AMSIB Academy Days

 [Exploring AI in the Classroom: Takeaways from the AMSIB Academy Days](#)

On 27 January, during the AMSIB Academy Day, teaching staff came together for an AI-HED Workshop on AI in Teaching and Learning. The goal was to explore how artificial intelligence can be meaningfully integrated into higher education, from a practical and pedagogical standpoint.

From evidence to practice

We presented insights from our primary research with the pre-course survey and a focus group, and our use case on Consumer Branding lectures.

Reflecting on our own ...

## Pilot Courses at UAS BFI Vienna, Austria

 [Pilot Courses at UAS BFI Vienna, Austria](#)

The University of Applied Sciences BFI Vienna (UAS BFI Vienna) has launched its Pilot Courses within the Artificial Intelligence in Higher Education Teaching and Learning (AI-HED) project, co-funded by the European Commission through the Erasmus+ programme.

As part of this European initiative, UAS BFI Vienna's lecturers are exploring how Artificial Intelligence (AI) can be embedded into higher education in a responsible, inclusive, and practice-oriented way — connecting ...
