Teaching and Learning

Find the best AI tools

New tools are launched every day, and it's hard to know which ones belong in the classroom. Our interactive Heatmap shows AI-based tools against two frameworks: the DigComp 2.2 digital competence areas and Bloom's taxonomy of cognitive engagement. This way, you can navigate with more confidence towards your teaching goals!

AI-HED Follow-up workshop brings together european educators to reflect on AI in Higher Education

On March 18, 2026, the AI-HED Pilot Semester Follow-Up Workshop took place, marking a key milestone in the AI-HED project.

The workshop was held in a hybrid format, combining a centralised online session with local discussions across partner institutions, engaging lecturers involved in the implementation of the pilot courses.

AI Glossary

In each newsletter we highlight an AI term you may not know.

Natural Language Processing (NLP)

A branch of AI that focuses on the interaction between computers and humans through natural language.

Description: NLP combines linguistics and AI to enable machines to understand, interpret, and respond to human language, facilitating applications like translation services and sentiment analysis.

Example: Voice-activated assistants like Siri or Google Assistant.
